Profile

Web and Mobile Development Engineer (2025) building backend services with **Java** and **Spring Boot**, **Angular** front ends, and **Flutter** mobile apps. Hands-on with **REST API** design, **OAuth2/JWT** security with **Keycloak**, **Docker**, and **Clean Architecture**. Open to remote and relocation opportunities.

Professional Experience

Full-Stack Engineer Intern (Final-Year Project) Feb. 2025 – Jul. 2025
FinStart Vision Afrique, Tunis

- Built a cross-platform fruit traceability mobile app with **Flutter**, structured with **Clean Architecture**.
- Developed business logic and **RESTful** services with **Java** and **Spring Boot**.
- Secured the platform with **OAuth2/JWT** through **Keycloak**.

Full-Stack Intern Jun. 2024 – Jul. 2024
Viore Digital, Nabeul

- Built a web booking application with **PHP**, **Laravel**, and **MySQL**.
- Implemented reservation, cancellation, availability management, and booking conflict prevention.
- Developed **REST APIs**, authentication, role management, and an administrative dashboard.

Software Development Intern Jun. 2023 – Jul. 2023
Groupe Chimique de Gabès, Gabès

- Developed a **Java** desktop application for internal data management with CRUD and secure authentication (**Oracle** database).

Full-Stack Intern (Bachelor's Final-Year Project) Feb. 2022 – Jul. 2022
Sadeem, Gabès

- Developed a freelance platform with **Spring Boot** and **MySQL**; secured the APIs with **Spring Security** and **JWT**.
- Wrote unit tests with **JUnit**.

Projects

EventPlanner – Event Planning Platform Feb. 2024 – May 2024
TEK-UP University,

- Spring Boot** REST APIs secured with **Spring Security** and **JWT**, **MongoDB** storage, containerized with **Docker**.

Expense Tracker Oct. 2023 – Jan. 2024
TEK-UP University,

- Full-stack app with **Angular** and **NestJS**: transactional APIs and financial report visualizations.
